

Here is a patch for Windows 7.xx and 8.xx the missing Resource All the templates and profiles and so just install ColorQuartet as normal and before starting the program unpack Resource folder and place the entire folder in the root of ColorQuartet like this:

Normally located in C:\Program Files (x86)\Esko-Graphics\ColorQuartet Pro 5.2 if you already opened the program and get a error message close the program and do the patch.
